

Leave the Wisconsin no call list as it is. It stops telemarketing businesses in their tracks. I have not received a single call during the past year. The no call list is especially good for senior citizens. They do not get unwanted calls that can make them give information that no one other than family should have. We need to protect our senior citizens in every way we can. The FCC should be looking out for the senior citizens because they are the most vulnerable to scams. FCC use your head for once and let the states do their thing in protecting the consumer, which Wisconsin has done a good job in doing.
